

ONEVIEW™ EXPANDABILITY

Intuitive, Reliable, & with Superior Support

Stressed over dispatching, tracking hours, and locating assets? Are your maintenance costs through the roof? Worried about driver retention and safety?

Fleet management doesn't have to be daunting.

With the right solution, you'll be able to eliminate headaches, decrease expenses, and increase profits.

With OneView™'s by-the-minute real-time tracking, billions of readings every day, and an unprecedented near 100% uptime, that means you'll never lose track of your drivers, vehicles, or assets. Plus, with excellent support and training from the start, transitioning to or adopting OneView™ means companies benefit from improved efficiency from Day 1.

Key Features

Flexibility

Expandable & Open API

Comprehensive

Fleet and Mobile Workforce Tools
for any industry, any fleet size

Optimize Operations

Dispatch, Maintenance,
Monitor Behaviors

Save Time

Eliminate redundancies and
ditch unnecessary paperwork

Compatibility

A variety of vehicles and assets
integrate with OneView seamlessly

OneView™ Solutions

The OneView™ platform provides fleet and equipment operators with the most robust, reliable and expansive features to help reach the most aggressive competitive advantage in today's complex and increasingly costly commercial and industrial environments.

Truck, Trailer & Asset Management

ASSET TRACKING

Track your assets' locations to prevent theft and optimize your operations.

EQUIPMENT MANAGEMENT

Manage equipment location, utilization and diagnostics and optimize your assets.

REEFER MANAGEMENT

Remotely track, monitor, and control the temperature of refrigerated trucks, trailers, or shipping containers with all major OEM makes and models.

TRAILER TRACKING

Track and monitor trailer location and utilization to maximize your fleet efficiency.

TANK-LEVEL MONITORING

Automate your business processes and prevent costly overtime by remotely tracking, monitoring, and receiving up-to-date alerts on bulk tank fluid levels.

Safety & Compliance

CAMERAS

Improve driver behavior with AI-based incident detection and in-cab feedback, improving safety trends and protecting you with video evidence including external cameras.

DVIR & INSPECTIONS

Inspect your assets quickly and easily with an app – capturing defects with images and tracking repairs.

ELD & COMPLIANCE

Our US and Canada certified ELD compliant solution makes HOS management easy, with real-time compliance visibility.

Enhanced Fleet Solutions

DISPATCHING & LOGISTICS

Communicate task assignments in real-time to mobile workers through customized workflows, routing, electronic forms and two-way messaging.

ELECTRONIC FORMS

Eliminate paper and process critical data more quickly, reducing time to invoice and improving accuracy.

FLEET MANAGEMENT

Manage your fleet vehicles and drivers in real-time with location, utilization, diagnostics, scorecards and more.

FLEET MAINTENANCE

Leverage asset data to schedule maintenance work, easily analyze trends, spot recurring problems, and reduce downtime and costly repairs.

TIRE PRESSURE MONITORING

Monitor tire pressure and temperature, promoting better fuel efficiency, safety, and vehicle performance.

WEIGH STATION & TOLL BYPASS

Drivewyze enables commercial truck drivers to bypass weigh stations, saving time and money.

ROUTING

Optimize driving routes and get more done in less time, reducing fuel consumption and maximizing efficiency.

NAVIGATION

In-cab turn-by-turn navigation with voice-guided directions to desired destinations, real-time traffic alerts, detours, ETA's and more.

DIGITAL LIBRARY

Store, manage and remotely access documents, images and other files, from anywhere.

Integrations

API INTEGRATIONS

Create a seamless user experience with 3rd party software and streamline business processes, saving time and reducing errors.

OEM DATA

Vehicle and equipment OEM data plus all operations in one platform.

SENSOR DATA

Add-on sensors for increased visibility to temperature, humidity, on/off, open/closed status and more.
